

GSA has been working to improve our customers' experience. During several recent surveys conducted by GSA Advantage!, customers have expressed concern about differing Minimum Order Quantity (MOQ) information. Therefore, GSA has changed how MOQ's are handled and displayed on GSA Advantage!.

A change to the [Advantage! Schedules Input File \(SIP\) program](#) is coming. GSA Multiple Award Schedule contract holders will no longer be able to upload their MOQ in their SIP File. This Advantage information will now come directly from the contractual terms and conditions agreed upon at the time of contract award or modification thereto.

Customers are more likely to purchase items from contractors with lower MOQs. GSA MAS contract holders will have the option to lower their MOQ's by submitting a modification request via the [eoffer/emod system](#). If you have questions or concerns, please contact your Contracting Officer.

As always, if you need assistance with your Advantage Account, please visit the [Vendor Support Center](#).
